Covering the full spectrum of technical maintenance and logistics solutions for rotary- and fixed-wing aircraft, as well as related human capital services, GAL helps military and civilian customers simplify maintenance and maximise asset availability. Leveraging our expertise and strong OEM and MRO service provider relationships around 3,000 GAL employees work at our headquarters and across nearly a half dozen customer sites delivering exceptional levels of fleet readiness.

AVIATION MAINTENANCE

GAL provides a wide range of aviation maintenance services, from routine inspections to customized repair and overhaul of aircraft systems, and integrated sustainment solutions delivering guaranteed aircraft availability. We also provide capability and facility enhancements, including intermediate maintenance shop design and implementation, as well as ERP integration solutions.

ENGINEERING AND UPGRADES

Our technical teams are trained and certified to perform a range of aircraft modification and upgrade services. Whether aircraft are approaching obsolescence, require upgrades to meet mission enhancements, or face new regulatory requirements our teams work with customers, OEMs and systems providers and solutions partners to engineer, implement, integrate and certify modified aircraft that deliver the highest performance.

AIR DEFENCE SERVICES

We provide comprehensive support to air-defence equipment and systems maintenance and supply chain solutions, including quality and production control, logistics planning, supply and warehouse support, programme acquisition and procurement services, and repair and return support.

LOGISTICS AND SUPPLY CHAIN

We provide agile, end-to-end logistics and supply chain services as a stand-alone offering or as part of an integrated lifecycle solution. Working with OEMs, MRO service providers and regional suppliers across more than a dozen rotary- and fixed-wing platforms gives us access to extensive engineering data, tooling and expertise to deliver exceptional service and technical support to aircraft owners and operators.

MANPOWER AUGMENTATION

We augment our customers with the technical experts required to help them effectively implement aviation fleet and related asset-management services. Our solutions enable advanced technical support, command advisory, specialised training, maintenance consultancy, flight management system program consulting and technical assistance.
